

NOTICE OF CHANGE OF NAME AND MARK TO CHEMEON:

This document was published by Metalast International, LLC, before 2013. In 2013, **CHEMEON Surface Technology**, formerly Metalast Surface Technology, acquired all assets of Metalast International, LLC, and is the sole source of products and services (i) marketed as Metalast prior to June 10, 2015, and (ii) since then have been marketed under the **CHEMEON** mark. **CHEMEON** is not affiliated with David M. Semas.

FOR IMMEDIATE RELEASE

METALAST Surface Technology Announces Company Name Change to CHEMEON Surface Technology. CHEMEON Surface Technology, still First in the field, but no longer Metalast.

Minden, NV. – On April 9, 2015 the global provider of hard material surface engineering solutions will change its name to CHEMEON Surface Technology effective immediately. www.chemeon.com

METALAST Surface Technology, a business-to-business provider offering hard material, surface engineering solutions, announced today that the Company would begin operating under its new name CHEMEON Surface Technology. The name change is part of the re-branding efforts to better align the Company's name with its primary focus on innovation, new technologies, and global expansion. This name change further allows the Company its own distinct identity and eliminates the confusion between the Company's new leadership and values, and the former management.

"Changing the name to CHEMEON Surface Technology formalizes a shift in the Company's vision to advance the world's focus on environmentally responsible, corrosion resistant coatings and surface technologies, through the research and development of long lasting, non-toxic chemical solutions, technical training, and customer service that eliminates the need for hexavalent chrome and toxic metals. It will provide us with an unbiased opportunity to introduce new products and services, and expand our global operations to new markets," said Madylon Meiling, Ph.D., President and CEO of CHEMEON Surface Technology.

CHEMEON Surface Technology will continue to exclusively provide its acclaimed metal-finishing chemistries that have been associated to and previously marketed under the name METALAST, as well as new chemistries that will be branded under the new CHEMEON label, manufactured according to industry standards, and delivering superior performance. CHEMEON will continue to offer its customers the most advanced surface engineering solutions, which includes prodigious experience with our exclusive QPL Hexavalent Free Mil Spec CHEMEON TCP-HF (formerly METALAST TCP-HF), CHEMEON TCP-HF EPA and SP – Extended Protection Additive and Spray (formerly METALAST TCP-

HF EPA /METALAST TCP-HF SP), as well as CHEMEON TCP-NP - No Prep (formerly METALAST TCP-NP). CHEMEON will continue to provide this proprietary surface technology advantage via our network of Regional Sales Managers and Distribution Partners into the global marketplace. CHEMEON's exclusive surface technology has been proven over the years to produce the most consistent, repeatable, and uniform results with the highest performance levels for virtually all desired characteristics.

"Our partners and customers are optimistic about the change as it reflects the growth of our company expertise and future commitments, and also indicates a strategy for collaborative and sustainable customer solutions," added Madylon Meiling, President and CEO of CHEMEON Surface Technology.

CHEMEON Surface Technology is proud of its acclaimed partnership approach established by working with various segments of the Department of Defense and related industries providing Military Spec (MIL-SPEC) chemistry and solutions for the removal of Hexavalent Chrome Cr6, as well as, new technology innovation, particularly the development of trivalent chrome color additives for visual quality control. CHEMEON Surface Technology welcomes your partnership, suggestions, and questions. Please contact them at info@chemeon.com.

ABOUT CHEMEON Surface Technology

CHEMEON Surface Technology is the only Woman Owned Small Business in the world that is licensed by the US Navy to manufacture and provide MIL-SPEC QPD/QPL Hex Free/Trivalent Chromate Conversion Technology. CHEMEON's patented and proprietary chemistries are internationally recognized for providing environmentally responsible hard material, surface engineering treatments and solutions.
